

NX700 Series

2 Wire Video Intercom System

NX700 series intercom systems are based on 2 wire technology i.e. they use only 2 wires for running both power and data to provide a cost effective, fast and convenient way to install a video intercom system over 2 wires.

NX700 series intercoms are ideal for retrofitting or upgrading old analog systems running on non standard cabling to state of the art IP Video systems. An optional IP gateway module is also available to connect the system with the Data networks for receiving calls on mobile phones.

Outdoor Units

- Aluminum alloy IP65 rated weather resistant housing
- HD Camera with 170 degree fish eye lens
- Integrated IR LEDs for night vision
- option for upto 8 backlit call buttons with name tag.

Indoor Monitors
